## services

### Wireframes & Mockups

I have experience designing wireframes to plan the basic structure and mockups to showcase the final interface using tools like Figma.

### Design and Development

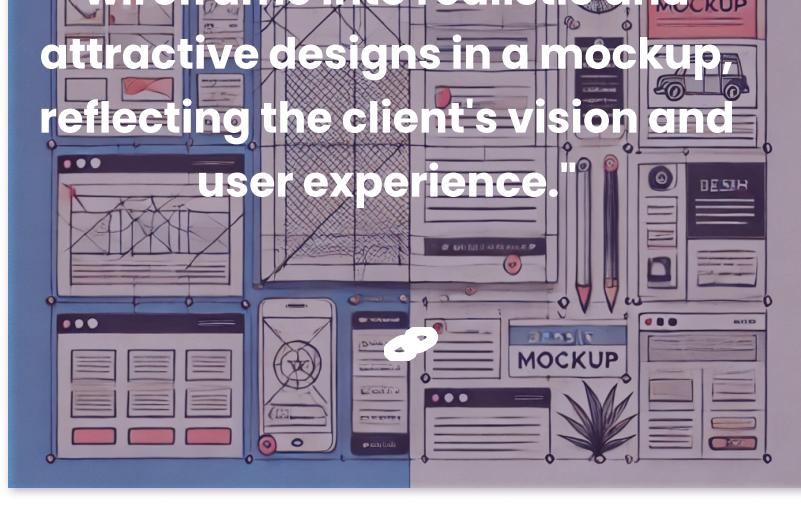

Designing and developing user interfaces (UI) using HTML and CSS to create visually appealing and user-friendly designs while enhancing the user experience.

### Building responsive websites

that function flawlessly across all devices, ensuring that the website is optimized for smartphones, tablets, and desktops to provide a seamless and cohesive user experience.
